Honeywell ComfortPoint® 3.2 BACNET PICS

BACnet Protocol Implementation Conformance Statement

Date: April 8, 2008
Vendor Name: Honeywell International, Inc.
Product Name: Honeywell ComfortPoint® Supervisor
Product Model Number: CP-S-AX, CP-S-AX-SBS
Application Software Version: 3.2.20.1
Firmware Revision: 3.2.20
BACnet Protocol Revision: 4

Product Description:
Honeywell ComfortPoint® Supervisor is a flexible network server used in applications where multiple Honeywell ComfortPoint controllers may be integrated providing the ability to aggregate data, view, monitor, and control BACnet devices over IP, raw Ethernet, or MS/TP media. ComfortPoint Supervisor serves real time graphical information displays to standard web-browser clients. Devices, points, schedules, and logs can be learned and managed via the Niagara AX Framework. In addition, CP Supervisor points, schedules, histories, and alarming can be served via BACnet IP to other BACnet Clients for monitoring and control.

BACnet Standardized Device Profile (Annex L):

☒ **BACnet Operator Workstation (B-OWS)**
☐ **BACnet Building Controller (B-BC)**
☐ **BACnet Advanced Application Controller (B-AAC)**
☐ **BACnet Application Specific Controller (B-ASC)**
☐ **BACnet Smart Sensor (B-SS)**
☐ **BACnet Smart Actuator (B-SA)**

Additional BACnet Interoperability Building Blocks Supported (Annex K):

Data Sharing DS-RP-A, B DS-RPM-A, B DS-WP-A, B DS-WPM-B DS-COV-A, B DS-COVU-A, B	**Device & Network Management** DM-DDB-A, B DM-DOB-A, B DM-DCC-A, B DM-RD-A, B DM-TS-A, B DM-UTC-A, B DM-LM-A, B DM-BR-A, B
Alarm & Event Management AE-N-A, I-B AE-ACK-A, B AE-ASUM-A, B AE-ESUM-A, B AE-INFO-A, B	**Trending** T-VMT-A, I-B, E-B T-ATR-A, B

Scheduling	**Network Management**
SCHED-A, I-B, E-B	NM-CE-A

Segmentation Capability:

Feature	Supported	Window size
Transmit Segmented Messages	yes	10
Receive Segmented Messages	yes	any

Standard Object Types Supported:

- The CreateObject and DeleteObject services are not supported, so no objects are dynamically creatable or deletable through BACnet service requests, although these objects are dynamically creatable and deletable through Niagara.
- No general range restrictions exist; however, certain specific applications may have specific range restrictions.
- All potentially available properties are listed for each object type.
- Optional properties are listed in *italics*. Not all instances support all optional properties.
- Writable properties are listed in **bold**. Any range limitations are expressed in parentheses following the property name.

Notes from Table

1. The File_Size property of File objects is only writable if the underlying system file is changeable.
2. The Setpoint property of Loop objects is writable only if the setpoint is not linked from within Niagara.
3. The Recipient_List property of the Notification Class object will maintain entries that are internally configured within Niagara.
4. The List_Of_Object_Property_References property of the Schedule object will maintain entries that are internally configured within Niagara.
5. The Priority_For_Writing property of Schedule objects is not important for internal Niagara operation, as the priority at which a point is commanded is determined by the input to which the Schedule output is linked.
6. These Trend Log object properties are not writable if the backing history for the exported Trend Log is a Niagara-generated history. If the history is created as a BACnet Trend Log, then they are writable.
7. Trend Logs in Niagara are either COV or Interval. So the Log_Interval property cannot be written to a value other than 0 for COV logs, or to 0 for interval logs.

Object Type	Properties

Data Link Layer Options:

☒ BACnet IP, (Annex J)
☒ BACnet IP, (Annex J), Foreign Device
☒ ISO 8802-3, Ethernet (Clause 7)
☐ ANSI/ATA 878.1, 2.5 Mb. ARCNET (Clause 8)
☐ ANSI/ATA 878.1, RS-485 ARCNET (Clause 8), baud rate(s) _____
☒ MS/TP master (Clause 9), baud rate(s): 9600, 19200, 38400, 76800
☐ MS/TP slave (Clause 9), baud rate(s): _____
☐ Point-To-Point, EIA 232 (Clause 10), baud rate(s):_____
☐ Point-To-Point, modem, (Clause 10), baud rate(s): _____
☐ LonTalk, (Clause 11), medium: _____
☐ Other:

Device Address Binding:

Is static device binding supported? (This is currently necessary for two-way communication with MS/TP slaves and certain other devices.) ☒Yes ☐ No

Networking Options:

☒ Router, Clause 6 – Routing configurations: Ethernet-IP, Ethernet-MS/TP, IP-MS/TP
☐ Annex H, BACnet Tunneling Router over IP
☒ BACnet/IP Broadcast Management Device (BBMD)
Does the BBMD support registrations by Foreign Devices? ☒ Yes ☐ No

Character Sets Supported:

Indicating support for multiple character sets does not imply that they can all be supported simultaneously.

☒ ANSI X3.4	☐ IBM™/Microsoft™ DBCS	☒ ISO 8859-1
☒ ISO 10646 (UCS-2)	☐ ISO 10646 (UCS-4)	☐ JIS C 6226

If this product is a communication gateway, describe the types of non-BACnet equipment/networks(s) that the gateway supports:
This product supports communications between BACnet and any third-party system to which Niagara can connect. Contact Tridium for a list of supported protocols.
