Notes on the specification of the following object types:

Writable properties are read only if they are under program control.

Variants of object types (different set of properties) are possible in the case of value objects (e.g. Analog Value). The variants are distinguished by the object tag. The object tag is listed as additional information in the EDE file.

5 Desigo PXM20 Operator Unit

Date	: 21 June 2013
Vendor name	: Siemens Building Technologies (Vendor ID 7)
Product name	: Desigo PX automation station
Product model number	: PXM20, PXM20-E
BACnet protocol version	: 1.12
Application software version	–
Firmware revision	: V5.10

5.1 Product description

The Desigo PXM20 operator unit ensures the convenient display and operation of Desigo PXC automation stations via BACnet network communication. The graphics based display with clear text and direct access via the keyboard ensures a most user-friendly operation.

All values visible in the system can be displayed in accordance with the defined operator profile. Typical displays: display of current values, set point and parameter settings, maintenance and error messages, alarm lists and single alarm messages with acknowledgement option and/or reset, definition of time schedulers (7-day schedules and exception programs), plant switching, login and password inputs. An integrated common alarm message system with acoustic and visual indication is provided.
